Business plan for restaurant pdf

"To Go" orders are often "convenience buys" which customers make based on financial, social, and personal needs. Nowadays, thanks to busy schedules, people often prefer to have their food in their home or office - not at the restaurant. They hardly have the time to travel to a good restaurant or wait to get a table at a restaurant. This is good news for your takeout business, and exactly why every "to-go" order should send out your latest takeout menu.

When your customer is busy, their best option is to call up your restaurant and place a "To Go" order. With your takeout menu in hand (or posted online as a downloadable PDF) a customer is way more likely to place an order by phone or through online services. This will enable you to maintain customer loyalty and keep customers coming back for more.

You can also use printed takeout menus to promote online ordering via your website. Doing so will not only help you capture new revenue, but also help you to grow an in-house marketing list full of emails and mobile phone numbers. This is extremely valuable for long-term success!

Generally, a "To Go" order starts with a takeout menu, which includes food like pizzas, pasta, soups, kebabs, fried items, roasted items, grilled items, and more. Takeout menus can be prepared very quickly and are easy to pack for transportation to various places (when they contain containers for example). They are ideal for travelers, professionals, students, children, and party planners. Takeout menus are also reasonably priced and easy to design and print. Therefore, you do not need to spend a lot of money to get customers ordering from you more frequently for pick-up or delivery.

Promote your "To Go" business and generate more revenue. The power is in your hands and starts with effective menu printing designed to increase your sales.

How to complete a Food Safety Management Plan

All food businesses are required by law to have a documented food safety management system in place, to show how they are producing safe food. This document can be used to meet this requirement for small scale home bakers.

The safety points begin on page 9. Look at each **safety point** in turn and complete the right hand column to explain how **you**, as the business operator, ensure the food you produce is safe.

You should also examine the flow chart (page 8) to see if you follow the same steps and amend if necessary to fit how you work.
